

FRANK HAVERMANS

Frank Havermans: *Zwarte Structuur 1*, 2017

- Wand-relief, karton, zwarte verf
- Editie: 7 + 1 a.p.
- Prijs: 850 euro

Frank Havermans. With his structural focus on cities and building, Frank Havermans is a typical 'Cityscapes Artist'. His works fall into two categories: on the one hand his so-called "KAPKARs and on the other his TOFUDs. His KAPKARs are concrete and location specific architectural interventions mostly in public space. The TOFUDs are city-models, depicting Havermans' vision on the future development of cities. Although their subject, scale, character and relation to reality hugely diverge, the hand of their master is recognizable in both. Havermans' works always show an emphasis on craftsmanship, quality, honesty and attention. Since he always manufactures his works himself they all possess a strong tactility and nearly animated personality.

Zwarte Structuur 1. As part of the Cityscapes Builders Selection we offer a work in edition of Havermans' most recent 'Zwarte Structuur' series. The series embodies a new step: still representing models for future cities, the works deliberately recycle elements from earlier works. The combination of those elements results in a new idiom, that is fresh and new, but also unmistakably carries Havermans' signature.
